ONE MORE THING: Our producer partner Azahar put the leg(work) into legends! How? By searching the most remote areas of Colombia to find the best farmers & product. And instead of having these coffees sent on to a mill to be mixed up in regional profiles (90% of Colombia's coffee ends up in blends!), they've given us direct access to these individual harvests. This exceptional coffee is one of six small lots we're featuring from Nariño & Huila, as part of our limited Colombia Small Lot Series.
